

Chicago Shoot Out

2/3 qualifying runs

3 rounds of racing (unless we have a time problem)

The two competitors with the most points after 3 rounds will contest the final.

One point is awarded for a win.

If more than two competitors are on equal points after the last round the finalists will be determined by the following method.

The two competitors with the most points that was closest to their dial in the last round (a breakout run is not considered in these calculations).

In the remote possibility that we still have a tie, the competitor that ran first (time of day) will be deemed to be the other finalist.
